Rule-Based Deck Building Tips

When choosing which cards to put in your 60-card deck, keep these core gameplay rules in mind:

- **Pack Plenty of Level 1-3 Creatures:** You must have a Level 1-3 Creature in your starting hand of 7 cards. If you don't, you must take a mulligan. If you take 4 mulligans, you automatically lose the game. Build a strong base of Level 1-3s to prevent this.
- **Mind the Sacrifice Chain:** Higher-level creatures require sacrifices to be played.
    - You need Level 1-3 Creatures to summon Level 4-6 Creatures.
    - You need Level 4-6 Creatures to summon Level 7-9 Creatures.
- **Deck Tip:** Don't put too many Level 7-9s in your deck without enough lower-level creatures to sacrifice for them.
- **Match Your Elements:** A Creature's color indicates its typing (e.g., Purple = Dark). You must attach matching Power Cards to use their attacks. Ensure your deck has the right ratio of specific Power Cards to match your Creatures. (Note: Blank Power Cards can be used for any Creature type).
- **Read Level 10 Requirements:** Level 10 Creatures cannot be summoned normally. They require specific cards or conditions to be met (e.g., having specific Secret cards in play). If you put a Level 10 in your deck, make sure you also include the specific cards needed to summon it!
